17th April 2013

To whom it may concern,

R-TEK has used the services of More Training for several years and I am delighted with the quality of the training and general service which they provide to our Company.

More Training has tuned-in to the needs of our business, developed training programmes which have addressed those needs, and applied those training programmes in a way that is complementary to our daily operations in order to minimise disruption. The Training Programmes delivered by More Training have resulted in quantifiable positive outcomes for our business and I intend that this will continue into the future.

More Training has proved to be very flexible in adapting to our changing needs and circumstances and I have been impressed by their professionalism in all aspects of their dealings with R-TEK.

I have no hesitation in recommending their services to any other organisation as they have undoubtedly earned their excellent reputation.

Yours faithfully,

Alan Culliford

HR & General Affairs / Purchasing Manager
